

Collection containers for medical waste

ClinicBOXX[®]

FUTURE SOLUTIONS **TODAY.**

ClinicBOXX®

UN certified

Meets the requirements of UN 3291 for medical waste and is ADR-approved for the transport of hazardous goods.

Innovative reusable system

Robust, disinfectable and reusable – the ClinicBOXX® saves resources and avoids environmentally harmful plastic incineration.

Practical handling

The ClinicBOXX®60 (height 76 cm) perfectly fits below worktops and is the ideal collection container, even for confined work areas.

High level of safety

The collection container features a liquid-tight, airtight lid and secure snap lock – for even more hygiene and protection.

Mobile/ergonomic

Easy to manoeuvre with solid rubber wheels, handling in a healthy and upright posture (ClinicBOXX60 with optional extension handle).

Versatile areas of application

Whether hospital, practice, retirement home, maternity centre or laboratory – the ClinicBOXX® is available with 60 l, 120 l and 200 l and offers efficiency, safety and convenience for every requirement.

For the environment

ClinicBOXX® stands for sustainability that pays off. Resource-saving and efficient, it offers maximum safety for the daily routine. The reusable system eliminates the need to incinerate large quantities of plastic, which is harmful to the environment and significantly reduces CO₂ emissions from medical facilities. The transport efficiency and durability also help to save energy and reduce costs.

The advanced solution for medical waste

The ClinicBOXX® reusable system combines maximum safety, ergonomic handling, versatile application options, durability and sustainable efficiency. Available with 60 l, 120 l and 200 l, the UN-certified and ADR-approved collection container offers the right solution for every requirement – whether in confined working areas or for high waste volumes. For use in hospitals, medical and veterinary practices, retirement homes, maternity centres and laboratories, the ClinicBOXX® is impressive. With solid rubber-tyred wheels, stackability in up to 3 levels and a liquid airtight sealed lid system – for maximum durability, mobility and safety. The containers can also be moved effortlessly and posture-friendly in an upright position (ClinicBOXX®60 has optional extension handle). The sustainable reusable system avoids the environmentally harmful incineration of large quantities of plastic and is a safe and responsible container which can be reused after waste collection and emptying.

The currently applicable regulations must be observed on top of this.

Optimised for transport

12 ClinicBOXX®60 containers with wheels attached, can be stacked on top of each other on 2 Euro pallets and transported cost-effectively.

Recycled material

On request, we can manufacture the ClinicBOXX® from recycled plastic for greater sustainability in the healthcare sector.

Technical data

	Volume litres (nominal)	Height (mm)	Width (mm)	Depth (mm)	Wheels (mm)	Weight approx. (kg)
ClinicBOXX®60 (optional extension handle)	60	753	400	400	100	5
ClinicBOXX®120	120	960	498	554	200	11
ClinicBOXX®200	200	1045	580	674	200	14

Standard colour yellow body, yellow lid, for recycled material grey body, yellow lid. Individual labeling of containers possible on request.
